موضوع: استعلام ساخت داخل شرکت جهان پروفیل پارس

با سلام و احترام:

پیرو بررسی پرونده ثبت سفارش شرکت جهان پروفیل پارس بر درخواست واردات " کمپرسور چرخشی پیچی نوع سیال گاز طبیعی مدل "GQ22.23XZ" با کد تعرفه ۸۴۱۴۸۰۹۰ و مشخصات فنی مندرج در پروفرم شماره S017A-2، به اطلاع می رساند از آنجا که بررسی کالای مذکور منوط به رعایت شرط عدم ساخت داخل است، لذا مقتضی است نسبت به تعیین وضعیت تولید این کالا در حال حاضر، میزان تولید سالانه و مشخصات دقیق واحدهای تولیدی اقدام لازم معمول فرمایید. همچنین در زمان اعلام نتیجه، تصویر پروفرم مورد نظر متقاضی، تایید و پیوست گردد.

حسن میرزایی

Positive Displacement Blowers

Process Gas Blower Series GQ

GQ process gas blowers are ideal for use in steel plants for the compression of process, cooling, and seal gas. These blowers are often used as 2-stage units and are up to the most extreme challenges. Designed for multi-year continuous operation, GQ blowers are the preferred solution for process and cooling gas applications in iron direct reduction plant

Volume flow:

910 to 104.000 m³/h

Differential pressure

(Δp):

150 to 1.500 mbar

Medium:

Process Gases

Conveying:

Oil-free

The advantages of AERZEN Blower series GQ at a glance:

Combination of oil-purged mechanical seal with an upstream, flushable labyrinth permanently separates the oil and conveying chamber

Typically used in direct reduction plants for conveying of process- and cooling gas. Operating pressure range up to max. 6 bar where the medium has the corresponding inlet pressure.

Applications	Technical data
--------------	----------------

Process gas blowers from AERZEN function reliably in all industries, in all markets, and in all countries on earth.

AERZEN offers the process gas and coolant industries an incredibly broad spectrum of blower technologies - perhaps the broadest of any manufacturer. Machines that operate as stand-alones, in machine or container combinations, onshore and offshore. In every single key industrial application:

Chemical and petrochemical industries

- Compression of H₂ and CH mixtures
- Acetylene
- Ethylenes
- Lime kiln gas
- Rich gas
- Synthesis raw gas

- Butadiene
- Vinyl chloride
- Hydrogen sulphide
- Hydrogen

Refineries

- Hydrocracking
- Hydrosulphurisation
- Fractionating
- Reforming
- Catalytic cracking
- PSA
- Flare gas
- Compression of H₂ and CH mixtures Energy production
- Gas turbine supply
- Steam

Oil & gas conveyance and storage

- VOC recovery
- Natural gas compression
- Pipeline booster

- Underground gas storage

Industrial gases

- Hydrogen generation
- Air separation
- Argon
- Syngas Coolant industry
- Coolants (R1270, R290, etc.)

Helium refrigerator and liquefier

- Helium

Offshore

- Natural gas compression

Breweries

- Waste steam
