

## PC/PMMA 透明/耐力板生产线

PC /PMMA sheet production line

Экструзионная линия для производства листов из ПК/ПММА

生产的高端制品广泛用于光学、家电、建筑工程、装饰、家具、广告、工艺品等工业及民用各行业。品质均已达到世界一流产品的性能，并且我们拥有与之匹配的一流的专家工艺工程师团队，帮助用户调试，生产出高品质的产品，满足日常生产的技术要求！

Production of high-end products are widely used in optics, electronics, construction, decoration, furniture, advertising, handicrafts, and other industrial and civilian industries. Quality and performance have reached world-class products, and we have matching first-class team of expert process engineers to help users debug, produce high-quality products to meet the technical requirements of the daily production!

### 主要技术参数 main technical parameter

型号Model	Модель	130/38-2200	120/38-1400
适用原料Material	Материал	PC/PMMA	PC/PMMA
制品宽度Products Width	Ширина изделия	2100mm	1300mm
制品厚度Products Thickness	Толщина изделия	1.5-10mm	1.5-10mm
挤出机规格 Extruder Specification	Экструдер	130/38 45/30	120/38 45/30
最大挤出量Capacity(Max.)	Производительность(макс.)	550kg/h	450kg/h
