

IMPORTANT FEATURES:

High quality touch screen and PLC equipped composing the CNC system,connect to the production line.

High quality beeline rail guarantees the precision.

A memory of orders,realize non-stop automatic or manual change.

Speed synchronizes with board speed.Standard communication interface,easy to link with management system.

Alloyed steel thin-blades,sharp and long life of over 8 million meters,auto sharpening

The knife for computer control automatic or manual knife sharpening,edge trimming knife,improve production efficiency.

Using the synchronous belt transmission ,low noise,prolong using time.

Standard motorized body left-right rectification system 200mm

TECHNICAL INDEX:

Model	1800	2200	2500
Min. slitting width	135mm		
Changing order time (servo type)	1-2s		
Correction range	200mm		
Precision	± 0.5mm		
QTY of blade/ scorer	5/8 ,6/10 ,7/12		
Depth of creasing	12mm		
Design speed	150/200/250 m/min		

SPARTS BRAND:

PLC	France Schneider	Famous brand in the world
	MCGS	15touch screen
Servo driver	INVT servo	
Invert	France Schneider	Blade scorer motor driver
Low-voltage apparatus	France Schneider	Famous brand in the world
Proximity switch	Korea Autonics	Blade and scorer position proximity switch
Rotary encoder	Japan Omron	Score depth gap control
Linear guideway	Taiwan Hi-win	Blade&scorer order size change
Synchronous belt	Subak	Order change,blade&scorer running
Motor	Taiwan TECO	Slitter motor and scorer motor
Bearing	Germany IMROK China HRB	Blade running adopt IMROK,other HRB brand
Blade	Jifeng blade	Tungsten,8million meters running time
Air cylinder	Tianao Brand	Blade&scorer lifting
Solenoid valve	Tianao Brand	Blade&scorer lifting Blade sharpening
Correct range motor	Guoyou	
Suction motor	Guoyou	Waste paper suction
