- The type and specification of the upper and lower knock-outs are defined by the customer's technical requirements.

Forgings Produced on the Press

ERFURT

Model PKZ - 800 ton Capacity

Hot Forging Crank Press

Designed for production of forgings from ferrous and non-ferrous metals

- Increased zones of eccentric load application
- Production of highly accurate forgings
- Long term operation of the eccentric shaft bearings and connecting rods with optimal clearances
- Quick change and convenient die setting
- Quick elimination of press stalling
- Automated options available
- Effective control and diagnosis
