- Filtration in all cases where water free from suspended impurities is required. It can be mounted online.
- All containers are supplied without cartridge.

WIRE CARTRIDGE

Suitable for domestic use for the treatment of drinking water. Ministerial Decree 174 6/4/2004 - Ministerial Decree 25 7/2/2012.

Effective in removing suspended sediments, sand, silt and rust.

Manufactured from non-toxic 100% pure polypropylene yarn, they offer an efficient nominal level of filtration. Provided with a rigid internal core, also in polypropylene, which guarantees its stability.

Upon request, all models can be supplied with a filtration degree from 1 to 100 microns.
