

Rolling bearings

SKF mobile apps

SKF mobile apps are available from both Apple App Store and Google Play. These apps provide useful information and allow you to make critical calculations, providing SKF Knowledge Engineering at your fingertips.

Apple App Store

Contents

Unit conversions	6	B.3 Bearing size	85
Foreword	7	Size selection based on rating life	88
What is new in this edition	8	Size selection based on static load	104
Catalogue information and how to use it	10	Requisite minimum load	106
Units of measurement	11	Checklist after the bearing size is determined	106
Rotating equipment performance	12	SKF life testing	107
SKF Care	13	B.4 Lubrication	109
		Selecting grease or oil	110
		Selecting a suitable grease	116
		Selecting a suitable oil	120
		SKF bearing grease selection chart	124
		Technical specifications for SKF greases	126
Principles of rolling bearing selection	15	B.5 Operating temperature and speed	129
General bearing knowledge	17	Thermal equilibrium	131
A.1 Bearing basics	19	Bearing friction, power loss and starting torque	132
Why rolling bearings?	20	Estimating bearing operating temperature	133
Terminology	22	Speed limitations	135
Components and materials	24	B.6 Bearing interfaces	139
Internal clearance	26	The ISO tolerance system	140
Heat and surface treatment	27	Selecting fits	140
Standardized boundary dimensions	28	Tolerances for bearing seats and abutments	144
Basic bearing designation system	29	Surface texture of bearing seats	147
A.2 Tolerances	35	Seat tolerances for standard conditions	148
Tolerance values	36	Tolerances and resultant fits	153
Tolerance symbols	36	Provisions for mounting and dismounting	176
Diameter series identification	37	Axial location of bearing rings	178
Chamfer dimensions	37	Radially free mounted bearings for axial load	179
Rounding values	55	Raceways on shafts and in housings	179
A.3 Storage	57	B.7 Bearing execution	181
		Selecting internal clearance or preload	182
		Bearing tolerance class	187
		Cages	187
		Integral sealing	189
		Additional options	189
Bearing selection process	59	B.8 Sealing, mounting and dismounting	193
Bearing selection process, introduction	60	External sealing	194
B.1 Performance and operating conditions	65	Mounting and dismounting	199
B.2 Bearing type and arrangement	69	Inspection and monitoring	211
Arrangements and their bearing types	70		
Selection criteria	77		

Bearing selection examples	215	5 Thrust ball bearings	465
C.1 Vibrating screen	216	Designs and variants	467
C.2 Rope sheave	222	Bearing data	469
C.3 Centrifugal pump	228	Loads	469
		Temperature limits	470
		Permissible speed	470
		Mounting	470
		Designation system	471
		Product tables	472
Product data	237	6 Cylindrical roller bearings	493
 		Designs and variants	496
Ball bearings		Bearing data	504
1 Deep groove ball bearings	239	Loads	509
Designs and variants	241	Temperature limits	511
Bearing data	250	Permissible speed	511
Loads	254	Design considerations	512
Temperature limits	256	Mounting	512
Permissible speed	256	Designation system	514
Designation system	258	Product tables	516
Product tables	260	 	
2 Insert bearings (Y-bearings)	339	7 Needle roller bearings	581
Designs and variants	341	Designs and variants	583
Lubrication	348	Bearing data	598
Bearing data	350	Loads	606
Loads	353	Temperature limits	608
Temperature limits	355	Permissible speed	608
Permissible speed	355	Design considerations	609
Design considerations	356	Mounting	611
Mounting and dismounting	359	Designation system	612
Designation system	364	Product tables	614
Product tables	366	 	
3 Angular contact ball bearings	383	8 Tapered roller bearings	665
Designs and variants	385	Designs and variants	669
Bearing data	392	Bearing data	676
Loads	398	Loads	680
Temperature limits	402	Temperature limits	685
Permissible speed	402	Permissible speed	686
Design considerations	403	Design considerations	687
Designation system	404	Mounting	690
Product tables	406	Bearing designations	691
 		Designation system	692
4 Self-aligning ball bearings	437	Product tables	694
Designs and variants	439	 	
Bearing data	443	9 Spherical roller bearings	773
Loads	445	Designs and variants	775
Temperature limits	445	Bearing data	781
Permissible speed	446	Loads	784
Design considerations	446	Temperature limits	785
Mounting	447	Permissible speed	785
Designation system	449	Design considerations	786
Product tables	450	Mounting	788
		Designation system	790
		Product tables	792

10 CARB toroidal roller bearings	841	15 Support rollers	943
Designs and variants	844	Designs and variants	945
Bearing data	846	Lubrication	947
Loads	849	Bearing data	948
Temperature limits	850	Loads	949
Permissible speed	850	Temperature limits	950
Design considerations	850	Speed limits	950
Mounting	853	Design considerations	950
Designation system	855	Mounting	951
Product tables	856	Designation system	952
		Product tables	954
11 Cylindrical roller thrust bearings	877	16 Cam followers	963
Designs and variants	879	Designs and variants	965
Bearing data	881	Accessories	968
Loads	884	Lubrication	971
Temperature limits	884	Bearing data	972
Permissible speed	884	Loads	973
Design considerations	885	Temperature limits	974
Designation system	886	Speed limits	974
Product table	888	Design considerations	974
		Mounting	975
12 Needle roller thrust bearings	895	Designation system	976
Designs and variants	896	Product table	978
Bearing data	899		
Loads	902		
Temperature limits	902		
Permissible speed	902		
Design considerations	903		
Designation system	904		
Product tables	906		
13 Spherical roller thrust bearings	913	Engineered products	
Designs and variants	915	17 Sensor bearing units	987
Bearing data	916	Motor encoder units	988
Loads	917	Roller encoder units	996
Temperature limits	918	Rotor positioning sensor bearing units	998
Permissible speed	918	Rotor positioning bearings	1000
Design considerations	918	Product table	1002
Lubrication	919		
Mounting	920	18 High temperature bearings	1005
Designation system	921	Deep groove ball bearings for high temperature applications	1008
Product table	922	Insert bearings for high temperature applications	1010
		Bearing data	1011
		Loads and selecting bearing size	1012
		Design considerations	1013
		Relubrication and running in	1014
		Mounting	1014
		Designation system	1014
		Product tables	1016
		19 Bearings with Solid Oil	1023
		Designs and variants	1025
		Bearing data	1025
		Loads	1026
		Temperature limits	1026
		Speed limits	1026
		Friction characteristics	1027
		Mounting	1027
		Designation system	1027

Track rollers

14 Cam rollers	931
Designs and variants	933
Bearing data	934
Loads	935
Temperature limits	936
Speed limits	936
Design considerations	936
Designation system	937
Product tables	938
