

The All New FA

FA·LINE

Your Flexo Line for Business Innovation

THE CONCEPT

The new FA is the most versatile flexo press on the market - built around the modern press operator and designed to accommodate the printer's ever-growing needs. A benchmark of flexibility and modularity, the FA allows printers to enhance the perfor-

mance of their press with add-on Applications and Automation Packages. Last but not least, the FA is based on a 'Clean-Hand' design approach, providing clean hands during press operation from a minimum of hands-on press interaction.

The FA-Line represents the future of flexo printing.

We designed it to meet the requirements of printers who appreciate a truly innovative press design and a dynamic operator interface. The FA's Clean-Hand technology is unique in today's printing environment and incorporates all the latest technologies available in the industry. Any printer will enjoy working on this press.

For the first time we have created a truly production-ready platform on the basis of the Flexo Clean, providing even better support, more flexibility and higher overall value to our customers.

We have focused on creating a platform that ensures consistent job changeovers, with minimum of waste and delivery, superb print quality. The FA-Line really is technical-modularising flexo, print not have run balls and variations is determined by what the market is calling for.

DRINK-CARE ROLLERS WITH ANTI-SLIP SURFACE

NEW CLEANING DESIGN

YOUR WORKING UNITS READY

THE JOY OF OPERATION

The FA is built around the modern press operator, with an intuitive user interface and fully mobile print controls. The operator panel is easy to manage, and the wireless Control Tablets are HTML5-based, offering fast, instant print setting reactions.

Furthermore, the control system has multiple user interfaces - allowing several job functions to be controlled at once by multiple operators, and on multiple tablets. The user interface is offered in English, but can be translated on-demand into Spanish, Italian, French, etc. Simply name your preferred language, and we will accommodate.

THE OPPORTUNITIES

The FA allows printers to create new product lines standard to customers with custom-adding Ultra-Application and Automation Packages. This means expanding and enhancing your equipment with new, elegant, forward-looking solutions.

Application Packages allow printers to improve the overall capabilities of their press, adding color-printing, film, and more, while Automation Packages enhance the automation of your press, adding job file and sheet, automatic POC, register, etc.

Automation Packages

Application Packages

SPECIFICATIONS with (for finishing)	14"	17"	22"
Press speed	4,200 sheets	3,200 sheets	4,200 sheets
Maximum size	100 mm (4")	140 mm (5.5")	178 mm (7.0")
Printing width max.	100 mm (4")	140 mm (5.5")	178 mm (7.0")
Sheet size	104 x 152 mm (4.1" x 6.0")	104 x 152 mm (4.1" x 6.0")	104 x 152 mm (4.1" x 6.0")

THE NEXT STOP

Reach out to your local Nipeter representative and set up a live demo of the FA at one of our state-of-the-art Technology Centers.

Nipeter's global Technology Centers host large spaces for operating presses, well-equipped product areas, customer

trouges, as well as training and meeting rooms. Our marketing all teams are ready to show you the full potential of the press, and prepared to print any job you want to see. We look forward to showing you the new FA!
