

Good Quality Winding Machine - PT Secondary Winding Machine – Volmet

Short Description:

We always work as a tangible team to ensure that we can provide you with the best quality and the best price for [Embedded Pole](#) , [Epoxy Resin Hydraulic Casting Machine](#) , [Vacuum Pressure Gelation \(Apg\) Equipment](#) , Presently, we're wanting forward to even higher cooperation with abroad shoppers depending on mutual rewards. You should really feel totally free to make contact with us for more aspects.

Good Quality Winding Machine - PT secondary winding machine – Volmet Detail:

Secondary potential voltage transformer winding machine

VOL-480 Potential Transformer Winding Machine For Winding Secondary Coil:

Features:

The main control system of winding machine adopts the international most advanced PLC from Japan Mitsubishi, all data are set by the touch panel, and it can automatically compute the wire length. The core fixed part of this machine is made up of transverse movable ball rail and longitudinal adjustable working bench.

When winding, user can adjust the working bench position according to the iron core thickness, length and width, to keep the proper position among the iron core, winding ring and shuttle, thus, the winding ring and iron core produces the relative motion when winding, so as to realize the winding of secondary Coil.
