

JTB Automatic sticker labeling machine

Detailed photo:

The Scope of Application

It is for small round objects which can stand stably when labeling.

Device Characteristic:

1. Adopt mature technology PLC control system, operation is stable and high-speed
2. Using touch-screen man-machine control operating system, simple, and efficient;
3. Screw adjustment to suppress bottle move accurately;
4. Synchronization chain mechanism ensure labeling smooth with high precise;

5.Advanced technology of pneumatic coding system, print the batch number and expiry clearly.

6.Transmission-type roll label device, make sure the label attached more firmly;

Device Advantages:

1.Imported electric elements, stable performance and low failure rate;

2.Adopting photoelectric detection, PLC control, software operation, conveyor belt, labeling accurately high precision;

3.Can be operated alone or contract with the production line;

4.No bottle not labeling, automatic alarm when achieve leakage label.

5.The whole machine use the material of S304 stainless steel and anodized senior aluminum alloy.

Driving Mode	Servo motor
Production (bottle/min)	40-200 (bottle/min)
Labeling Speed (m/min)	≤40
Labeling Accuracy	±1.0 mm (subject to the roughness of the plane)
Operating direction	Left or Right
The application of bottle	Outer diameter 40-100mm; Height 35-350mm
The application of label	Height 20-140mm; Length 23-280mm
The inner diameter of label plate	76mm
The outer diameter of label plate	350mm (max)
