Less is More

Introducing Enviro-Lok, a brand-new polypropylene bag closure that is made to keep products safe and fresh, while also delivering a better potential for recycling. Of course, you still get the same strength and reliability that goes hand in hand with the Kwik Lok name. It has the added benefits of 34% less plastic than the standard Kwik Lok closure, 67% less water and 44% less carbon emissions emitted. Better for the planet and for your business.

A fresh start to sustainability

At Kwik Lok, we recognize that global food safety and sustainability go hand-in-hand with our family-forward approach to caring for our employees and customers. We have both a responsibility to minimize our impact and an opportunity to drive meaningful change.

Our new Fresh Start initiative is our promise to continually improve, innovate and support our community. At the core of our Fresh Start initiative, we have instituted a sustainability planning, governance and reporting system to hold ourselves accountable.

We carry packaging solutions for...

Bakery

Produce

Medical & Other

Our customers see the difference

The benefit of the Kwik Lok closure is that it is quick and easy to apply. This feature yields dividends to the packager and the consumers. The packager benefits because the machinery required to apply the closure is mechanically simple – this means lower original costs, longer operating life, few package mistakes and lower maintenance costs. The benefit to consumers is a closure that is easy to remove and just as easy to reuse. Consumers want reusable food packages that keep their food fresh.

“

Since promoting with our Kwik Lok closure and label system, our carrot profits have increased by 10% and new markets have opened to us. Kwik Lok helps us add value.

Louis Bouyer
Co-Owner, *Bouyer SCEA-Oceane*

“

At Wada Farms Potatoes, we have experienced the reliability and durability of Kwik Lok's closing solutions for over twenty-five years. Once again, Kwik Lok has created an unparalleled and efficient closing system that can stand up to the tough environment in our sheds.

Kip Yeats
V.P. Fresh Operations, *Wada Farms*

“

We tried others but have made the decision to use 100% Kwik Lok bag closers because we know we can count on them day in and day out for constant, steady, bag closing.

Jay Allison
Maintenance Manager, *Troyer Brothers Farms*

Find the best solution

Semiautomatic Closure

As your business grows, so do our solutions. Our semiautomatic bag closing machines are the most versatile and hard-working on the market.

FEATURES:

- Automatic features
- Printing capabilities
- High speed

[Learn More](#)

Automatic Closure

Take your production line to the next level with an automatic machine. These machines are equipped for variable speeds and are adaptable for most automatic bagging operations on the market.

FEATURES:

- Minimal oversight
- High speed
- Environmentally durable

[Learn More](#)

Hand Applied Closure

Give your product a professional look by choosing Kwik Lok. Our easily applied closures are an affordable solution for smaller production sites.

FEATURES:

- In-store applications
- Assures freshness
- Reliable

SUSTAINABILITY

Kwik Lok is leading the way in sustainable innovation

Kwik Lok is fully committed to continuing to innovate and invest in materials science. This enables us to offer products that utilize Post-Consumer Recycled (PCR) material or other materials that are recycled and recyclable. Kwik Lok's priority is helping our customers make advances in sustainability and minimizing our collective impact on the environment. For some, that means identifying opportunity to cut carbon emissions. For others, minimizing plastics is the priority. Most are trying to find a balance between the two. Kwik Lok has closing solutions that meet these challenges and continues to innovate better solutions.

Learn more about our solutions below:

LESS PLASTIC, LESS WATER, LESS CARBON!

Enviro-Lok, the new polypropylene bag closure made to keep products safe and fresh, while also delivering on a better potential for recycling. Enviro-Lok offers the same strength and reliability that goes hand in hand with the Kwik Lok name. It has the added benefits of 34% less plastic than the standard Kwik Lok closure, 87% less water and 44% less carbon emissions emitted, and it runs on your current Kwik Lok machines. Better for the planet and for your business.

Customers may also choose the new ultrasonic welded labels, offered only with the Enviro-Lok, for branding, tracing and traceability. This label is made from the same material as the Enviro-Lok and due to the ultrasonic weld technology removes the sticky adhesives. This makes Enviro-Lok even more prepared for recycling. A packaging solution where all the elements are made with one material, like polypropylene, makes it easier for the consumer to recycle with confidence.

Fibre-Lok - Less Plastic!

Fibre-Lok is a bag closure made from 100% natural cellulose fibers from post-consumer waste. Its backed by Kwik Lok's nearly 70-year history of reliability and is the clear choice in helping your company achieve its sustainability goals. Fibre-Lok is another important step in Kwik Lok's mission of transitioning the industry toward a sustainable future through innovation. This product is made of material from well-managed, FSC-certified forests and other controlled sources. All FSC-certified products only available through Canada.

In 2022 at the PMA Food Australia show, Kwik Lok and 500 other entrants from the show competed for the PMA Food's Best New Product Awards. Fibre-Lok was recognized as a top 3 finalist.

What makes Kwik Lok closures so special?

Lower initial cost

Kwik Lok closure systems provide customers and consumers with a practical, time-saving and low-cost way to keep food fresh.

Lower maintenance & operating cost

Our machines are proven reliable and efficient with service technicians ready to help.

Eco-friendly

The Kwik Lok bag closure is designed to be reused. Consumers find the closure simple to use and opening your package is easy.

Printable

The bag closure offers an ideal surface to print prices, dates, codes, symbols and traceability information.

Metal detector compatible

The Kwik Lok bag closure permits the use of metal detectors on your packaging line ensuring the safety of your product with a metal-free guarantee.

Marketing & labels

Stand out from competitors, and drive sales using labels for promotional purposes such as coupons, cross-advertising, and branding.

Bag closures are all around you

Kwik Lok protects product freshness and offers an easy way to reuse the bag without spillage. A package that is easy to re-close – is more likely to be re-closed. A closed bag protects the aroma, texture and taste and therefore will enhance your product image. A re-closable package gives the consumer a way to keep product from spilling when stored between uses. We manufacture bag closures in a wide variety of sizes, and thicknesses, which permit closing bags of a few ounces up to 50 pounds, or more.

Closures are available in seven colors that permit color coding and dates.

They can be applied with automatic or semi-automatic bag closing machines or hand applied.

Closures are available for film bags, mesh bags, and some paper bags.

Closures can be printed on with alpha numeric text and/or line drawings on the packaging line.

Types of closures

We offer a wide variety of closures to fit your packaging demands. Our staff will work closely with you to provide the best solution for your product and your customer. Here are our most commonly ordered options:

J-NRP

V-NRP

KM-NRP

VW-NRP

Packaging Solutions for Baked Goods

With Kwik Lok you can not only close your bagged packages but also label your bags and print coded traceability information on the closure. We offer these capabilities on all automatic, semiautomatic, and even hand-applied lines.

Close your bag

Kwik Lok's business is to support the delivery of fresh food safely, extend its life and reduce waste for the benefit of people and families everywhere in the world. This results in one of life's little conveniences: the ability to easily reclose a package.

Label your bags

Labels can be custom printed to your exact graphic specifications. Labels can be used to carry important package information. You can also use the attractive labels for promotional campaigns that can increase sales and add additional profits.

Print code / traceability information

Labels can be used to carry important package information such as variety, weight, size and bar codes.

We can help you find the right closure

Kwik Lok offers one-stop closure system solutions and sustainable options. Our expert engineers will help you find the right closure system solution for your product lines. We will work with you team to consider bag types size, product weight, line speed and printing needs.

Our metal-free guarantee

The best way to ensure no metal exists in your finished product is to use a metal-free Kwik Lok® closure or closure-label to complete your packing process.

Kwik Lok's closures permit the use of metal detection devices on the end of your packaging line. Minimize customer returns and quickly identify equipment by choosing Kwik Lok.

The 893C is the best in bakery closing technology

Kwik Lok introduces the new 893C closing machine featuring ethernet and wireless communications along with a host of new features. It is CE and cULus certified and closes as many as 120 bags per minute. Customers can conveniently view production data, machine life data and diagnostic information on the easy-to-use touch screen or on a phone, tablet, or desktop computer.

The new 893C helps bakers to be more efficient any way you slice it. It is simple to install on the bakery line and features state-of-the-art motion control along with enhanced safety features which include an emergency stop button, alarm indicator and bag jam detection and reversal. The 893C is label-ready, compatible with a variety of Kwik Lok brand closures.

The next generation is here

The new 910A Automatic Bag Closing Machine offers the same highly reliable Kwik Lok technology and takes it to an all-new level. The 910A provides a host of improved safety and operational features making the 910A even easier to operate while taking up less line space. A next-generation solution for the high-speed line, the 910A can close up to 120 bags per minute.

Important new benefits of the new 910A closure machine reflect input from customers. They include a lighter, more compact design, easy to clean aluminum and stainless-steel construction along with user-friendly mechanical components that offer increased accessibility for maintenance. All 910A machines come ready to run closure labels for coding, tracking, and promotional messages.
