Overseam Width	Material Thickness	Stitch Range	Speed Range	Transport
8 mm	Up to 8 mm	From 3 to 10 mm	Up to 2500 rpm	Synchronised Pneumatic Puller

Our **BURASCHI H450 PNEUMATIC** has recently been put on the market to meet the great demand of our clients.

It is an evolution of our previous net sewing machine H300 PNEUMATIC with the following implementations:

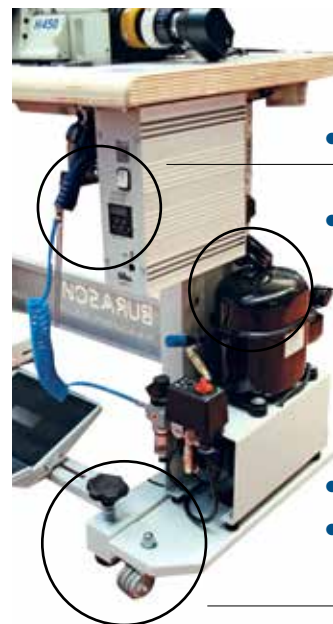

- H450 PNEUMATIC can work with small ropes during sewing.
- Greater strength of the main components, including: looper lever, looper, plates, presser foot.
- Greater overall strength of the whole sewing machine.
- Greater ease in making timing.
- Increased capacity of seam.
- Increase in the width of the seam.
- Greater speed.

Our high-end and heavy duty net sewing machine BURASCHI H450 PNEUMATIC is suitable for sewing nets with Dyneema yarn and netting with and without knots and it is great to make sports nets and safety nets. It also meets the need to couple light and medium to high thickness knotted netting in the net sector or however where knotless netting has to be joined laterally. Our BURASCHI H450 PNEUMATIC model is amongst the best for strength of its sewing components, for speed and range of accessories that complete the workstation.

Our professional BURASCHI H450 PNEUMATIC is supplied with electronic adjustable speed motor to better predetermine the sewing speed, according to the count of the netting; needle positioner to predetermine the stop position.

Our net sewing machine BURASCHI H450 PNEUMATIC is equipped with a pneumatic foot raiser controlled by a counter-pedal and synchronised pneumatic puller: the puller moves the material forward only when the needle has exited the netting, thus making sewing easier.

The double seam, once cut, is very robust and does not come apart easily, as the needle penetrates the netting (without damaging it) and the very fine and resistant thread, combined with the length of the stitch, makes the coupling highly resistant.

STANDARD CONFIGURATION

- Air Compressed Hand Gun
- Silent Compressor and Low Energy Consumption
- 360° Castor Wheels
- Sturdy, Adjustable Tilt Feet
