

2400(5600)/400 fourdrinier multi-dryer fluting paper production line

Usage: waste paper as raw material make fluting paper

Technical features:

1 paper width:2400mm

2working speed:150-400m/min

3quantitative:40-120g/m²

4nominal capacity:50t/d

5transmission way:division transmission

6guafe:3400mm

7decorate form:two floors layout

8design criteria:national standard export equipment

Part of the main equipment description:

The pulp departments,the fourdrinier department,press department,dryer department,the foundation and transmission parts
