

1. The component is made of stainless steel.
2. The component is used for industrial applications.
3. The component is available in various sizes.
4. The component is available in various finishes.
5. The component is available in various quantities.
6. The component is available in various colors.
7. The component is available in various shapes.
8. The component is available in various materials.
9. The component is available in various grades.
10. The component is available in various standards.
