●伸线胴:

底材采合金球墨铸铁(FCD-45), 经热处理调质后表面硬度达 HRC40° ± 2°

Material: Alloy ductile iron (FCD - 45).

After heat treatment and quenching, the surface hardness reaches HRC40° ± 2°

伸线胴寿命: 5 年 (大约), 视客户保养及操作情况.

The lifetime of trunk is about 5-8 years, according to the condition of customer using

伸线胴水冷却

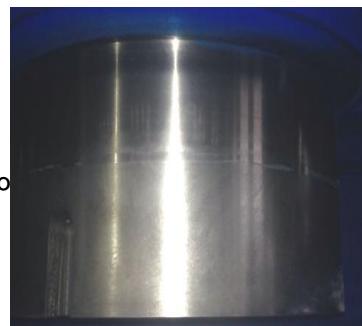

High efficiency trunk full water cooling cycle

伸线胴表面喷碳化钨钢后, 镜面研磨硬度达 HRC68° ± 2°

After the trunk surface sprayed with tungsten carbide, the mirror

伸线胴表面喷碳化钨钢, 高度120mm

grinding hardness can be HRC68 ° ± 2° , Height 120mm

●减速机Reducer:

传动效率95%较有力及扭力效率损失5%, 适合高负载长时间运转寿命长

95% transmission efficiency and 5% loss of torque efficiency, suitable for high load and long service life

材质为CM415合金钢经热处理后硬度可达HRC59°

The hardness of the CM415 alloy steel is HRC59 degrees after heat treatment.

●压力控制 Pressure control:

线压轮采汽压缸装置, 挂线时, 防止掉线, 安装于各伸线胴后方

The line pressure wheel adopts the steam pressure cylinder device to prevent the wire from being dropped when the wire is hung, and it is installed at the rear of each wire

●冷却系统 Cooling system:

伸线胴采用高效率循环满水位冷却循环快

The high efficiency circulation full water level cooling cycle is fast

标准眼模座采直接水冷眼模系统

Standard eye mould block directly use water cooling eye mould system

机台前提供循环水流控制阀门

The machine provide circulating water flow control valve

当停机状态时, 电磁阀自动启动并截断所有机台水流动作, 有效防止漏水问题

When the machine is in the stop state, the solenoid valve automatically starts and cuts off the water flow of all the machines, effectively preventing the water leakage problem.

故障自动报警装置 Automatic fault alarm device

自动盘元送线机Automatic disk feeder Model: AS\AL-30

这是一台能将传统式工法的30分钟缩短仅有4分钟内即可完成之全自动线材送线机,
自送线→ 垂直弯线头→ 校直 → 送线至眼模入口处一律由机械完成

This is one that can be shorten the traditional 30 minutes of the traditional method by c

The fully automatic wire feeder can be completed within the line, from the feed line to the vertical bendi

Straight line, line feed to the entrance of the eye mold, all machines.

自动完成, 适用于伸线机及直棒伸线机等大线径线材设备.

Automatically completed, suitable for large wire and wire equipment such as wire
drawing machine and straight bar drawing machine.

压线校直装置Press straightening device

校直: “X” “Y” 方向十字校正轮,

Alignment: "X" "Y" direction cross correction wheel.

其中有2组校正轮附油压缸控制.

There are 2 sets of correction wheel with hydraulic cylinder control.

校正轮组均表面硬度处理, 耐磨损

The correction wheel group is treated with surface hardness and wear resistance.

压线头组: 采油压系统Pressure head group: oil pressure system

AC马达与变频器控制, 速度自动调整并与伸线

AC motor and inverter control, speed automatic adjustment and extension.

机连动, 全部动作由机械自动运作, 可寸动正

The machine operates continuously, and all actions are automatically operated by the mach

逆转, 送线辊轮由油压缸自动控制.

The transmission roller is automatically controlled by the hydraulic cylinder.

备注 Remarks:

1. 以上技术数据仅供参考, 尚有以下相关因素会直接影响伸线质量、产量及速度

The above technical data is for reference only, there are the following factors will directly affect the quality of wire drawing, production, and

1. 盘元质量及尺寸

Plate quality and size

2. 伸线眼模

Eye die

3. 盘元之酸洗及皮膜之品质

Plate acid pickling and film quality

4. 润滑因素

Lubrication factor

5. 操作技术

Operation technology

6. 成品规格及质量

Finished product specifications and quality

7. 影响抽线速度与质量, 包括当地气候与湿度状况

Affect the speed and quality of pumping lines, including local climate and humidity conditions

8. 伸线减面率

Drawing Reduction rate

9. 其它附属设备及操作经验

Other ancillary equipment and operation experience

2. 买方须自行处理之项目 The purchaser shall deal with the item:

A. 电器线路安装工程 Electrical wiring project:

a) 落地式控制箱至操作桌至机械之电源动力线、控制线、讯号线路安装及外部电源线安装至落地式控制箱。

Floor control box to the operating table to the power of the power line, control line, signal line installation and external power cord installed the floor control box.

b) 落地式控制箱应置于在防尘室之现场工程

Floor control box should be placed in the field of dustproof room

c) 防尘室之冷气系统

Dust-proof room of air conditioning system

B. 水管路工程 The water project:

a) 循环冷水槽

Circulating cooling water tank

b) 循环冷水槽至机械之水管路工程

Circulating cold water tank to mechanical water pipeline project

c) 冷却水塔...等冷却系统

Cooling towers... Etc the cooling system

C. 汽压管路工程 Steam pressure pipeline engineering:

a) 空压机

Air compressor

b) 空压机至机械现场之汽压管路安装工程

Air compressor to mechanical site of the steam pressure pipeline installation

D. 配合机械之土木安装工程 With the mechanical installation of the civil works

以上设备每一道流程含基本操作指导与教育训练。

Each of the above equipment with basic operational guidance and education and training.

每一道流程含基本使用说明书、易损零件图册、标准件明细表、易损件配置图、电器线路图、接线图等相关配件说明书、常见故障排除说明

Each process with basic instructions, vulnerable parts Atlas, standard parts wearing parts configuration map, Electrical circuit diagram, wiring diagram and other related accessories manual, common troubleshooting instructions.

试车事宜 Commissioning:

A 力天会派遣两位试车工程师前往贵司厂内进行机器试机运转，并提供相关安装与操作技术之教育训练，为期7日。（每人每日美元\$200）

We will supply two test engineers to your factory for 7 days to machine commissioning and provide relevant education or training installation and operation technology. Everyone usd200 per day

B 力天所负责制造之机械及电气控制范围内，如有故障将全权负责，但其他与机器无关之责将不处理，如生产技术，等其余周边无法配合之设备。

We are responsible for the manufacture of mechanical and electrical control range. within the scope of the failure we will be solely responsible, but other non-machine-related responsibilities will not be dealt with, such as production and other equipment that cannot be matched around.

C 报价包不含相关试车人员来回机票，当地住宿，每天前往试车工厂交通费用(包含接机及送往机场)及相关饮食费用(包含抵达日与离开日)。

The offer does not include the relevant trainer round-trip air ticket, local accommodation, daily travel to the trial plant (including pick-up and airport transfer) and related food costs (including arrival date and departure date).

如有延长试车时间之必要，超过所预定之维修日期，费用则需另计。

If there is necessary to extend the time, the cost would be charged by your company.
