Description

ZTMX series agitator is applicable for storing and mixing circulation of the stock in pulping and papermaking industry.

ZTMX series agitator can produce big circulating capacity and lower specific electric consumption per unit. It can be normally used in the stock chest with stock consistency of 4.5%. The angle of propeller can be adjusted so as to increase or decrease stock circulation consistency. It is particularly suitable for waste paper stock.

Simple and reliable structure, convenient for maintenance.

Material specification for agitator

Main shaft is made in tempered by 40Cr steel
